BROADBAND

We are pleased to announce our ability to organise Broadband through ourselves. Underpinned by ISO certified organisations, we take network security and resilience seriously with extensive backup and disaster recovery protocols in place.

Whether you're looking to make business improvements, open a new location, adapt your business model or expand your existing operation, it's important to get the foundations right.

We've secured the best, most competitive prices which enables us to offer you more for less.

OPTIONS

Standard DSL - services which require a phone line:

ADSL

Fast data transmission, widely available with speeds up to 24Mbps.

Suitable for: home offices

- Low cost & setup fees
- Short lead times
- Static IP

FTTC

Super-fast, widely available with speeds up to 80Mbps.

Suitable for: Small offices

- Self or managed install with short lead times
- Two speed options: 40/10 or 80/20
- Static IP

FTTC G.FAST

Cost-effective, short lead times with speeds up to 330Mbps.

Suitable for: Small to Medium offices

- Turbo boost capability
- Hardware at cabinet boosts connection & speed
- Static IP

OPTIONS

Naked DSL - services which don't require a phone line:

SOGEA

Future proof technology, with speeds up to 80Mbps.

Suitable for: Small offices

- Simple ordering process
- Low costs
- Static IP

SOG.FAST

An alternative to PSTN, with 330Mbps speeds.

Suitable for: Medium offices

- Turbo boost capability
- Easy to support – single provider
- Static IP

FTTP

Fastest broadband option with 1Gbps speeds.

Suitable for: Medium To Large offices

- Fibre optic
- Quick, reliable connection
- Static IP

LEASED LINES

From ADSL to leased lines, we leverage the most up-to-date technologies from Gradwell to deliver results that enable you to always stay in touch with the people who matter most; your customers.

Underpinned by ISO certified organisations, we take network security and resilience seriously with extensive backup and disaster recovery protocols in place.

With access to the best deals from a range of top suppliers, we're able to deliver you a high-speed quality service at the most competitive rate.

Unlimited data usage

No bandwidth restrictions, regardless of your physical distance from the exchange. Use as much data as your business needs, whenever you need it.

OPTIONS

Our specialist leased line products

EOFTTC

Cost-effective, dedicated connections using existing cabling & infrastructure, offering speeds of up to 76Mbps.

- **Prioritised traffic with minimal contention**
- **Choose the speed you want to receive**
- **Static IP**

FIBRE ETHERNET

Dedicated, un contented super fast fibre optic cable connection for the fastest possible speeds & reliability.

- **Next generation internet – eliminate older infrastructure with superfast fibre installed directly from the exchange**
- **Symmetrical upload & download speeds of up to 10Gbps**
- **Static IP**

WAN - MPLS

Secure communication between sites with highest speed & level of reliability.

- **Multi-site networks with internet breakout**
- **Fully supported & backed up with SLA**
- **Multiple service options: back-up, SLA, static and additional IPs**
- **Static IPS**

VOIP SYSTEMS

VOIP stands for "VOICE OVER IP" which means the phone system is sent through internet connections instead of the old fashioned phone lines. This gives you a huge range of options at a much much lower cost, than an alternative phone system may cost.

Multi Lines

- Opening announcements
- Menus
- Hunt groups
- Calendar routing
